

Sreekar Somi Setty

Java Full Stack Developer | Oracle Certified Associate Java Developer

+1 (940) 843-3307 | sreekar1515@gmail.com | [linkedin.com/in/sreekars1515](https://www.linkedin.com/in/sreekars1515) | <https://github.com/SreekarSetty>

PROFESSIONAL SUMMARY

Results-driven Java Full Stack Developer with 5+ years of experience building scalable, high-performance applications in telecom, banking, and retail domains. Expertise in Microservices, Spring Boot, Angular, AWS Cloud, and AI-driven solutions. Proven track record in performance optimization, event-driven architecture, and delivering secure enterprise applications.

CORE SKILLS

- Backend: Java 8, Java 11, Java 17, Spring Boot, Spring Security, Spring Data JPA, Hibernate, Microservices
- Frontend: Angular (11–17), TypeScript, HTML5, CSS3
- Cloud & DevOps: AWS (EC2, S3, RDS, Lambda, CloudWatch), Docker, Kubernetes, Jenkins, CI/CD
- Databases: PostgreSQL, Oracle, MySQL, MongoDB
- Messaging: Kafka, Event-Driven Architecture, WebClient, FeignClient
- Other: GraphQL, REST APIs, JWT, Spring AI, LLM Integration, JUnit, Mockito, JMeter, Swagger, Git, Maven, Grafana

PROFESSIONAL EXPERIENCE

Java Full Stack Developer

AT&T, New Jersey

Feb 2024 – Present

- Designed and developed scalable microservices using Java 17 and Spring Boot for a high-traffic platform with 1M+ daily active users (DAU), designed to handle 2.5M+ requests per second with high availability, resiliency, and fault tolerance.
- Improved API response time by 40–60% through SQL query optimization, Redis caching, connection pooling, and elimination of redundant service calls.
- Built event-driven architectures using Kafka and AWS SNS/SQS, reducing inter-service dependency by 50% and improving asynchronous data processing reliability.
- Developed secure RESTful and GraphQL APIs enabling efficient data retrieval and reducing frontend over-fetching by nearly 35%.
- Implemented AI-powered chatbot and semantic search capabilities using Spring AI and LLM integrations, improving user query accuracy and customer engagement.
- Optimized PostgreSQL performance using indexing, partitioning, tsvector full-text search, and materialized views, reducing query execution time from seconds to milliseconds.
- Increased application throughput by 30%+ using asynchronous programming with WebClient, CompletableFuture, and non-blocking reactive patterns.
- Implemented JWT authentication and Spring Security role-based authorization, strengthening API security and reducing unauthorized access risks.
- Automated CI/CD pipelines using Jenkins, Docker, Kubernetes, and Helm, reducing deployment and rollback time by 60%.
- Identified and remediated 9 critical/high-severity security vulnerabilities by upgrading Maven dependencies and optimizing pom.xml configurations, ensuring compliance with enterprise security standards.
- Integrated observability solutions using CloudWatch, Prometheus, Grafana, and centralized logging, decreasing production incident resolution time by 40%.
- Developed responsive and reusable UI components using Angular 17, TypeScript, Angular Material,

HTML5, and CSS3, improving frontend development efficiency by 35%.

- Implemented Angular Reactive Forms, route guards (canActivate), lazy loading, and RxJS-based state handling to improve application performance and enhance user experience.
- Reduced frontend page load time by 45% through module lazy loading, code splitting, Ahead-of-Time (AOT) compilation, and API response optimization.
- Built dynamic dashboards and real-time data visualization screens using Angular and REST integrations, improving operational monitoring efficiency for business users.
- Collaborated with cross-functional Agile teams and participated in architecture discussions, code reviews, sprint planning, and production support activities.

Associate Software Engineer

Temenos India Pvt Ltd, India

Jan 2020 – Aug 2022

- Developed high-performance backend services using Java, Spring Boot, and Hibernate for enterprise banking applications.
- Built responsive frontend applications using Angular, TypeScript, HTML5, and CSS3, improving user experience across multiple devices.
- Optimized SQL queries, stored procedures, and indexing strategies resulting in significant database performance improvements.
- Enhanced inter-service communication using WebClient and FeignClient, improving reliability and reducing latency.
- Achieved 85%+ unit test coverage using JUnit and Mockito, improving application stability and reducing production defects.
- Conducted load and performance testing using JMeter to identify bottlenecks and improve application scalability.
- Designed and documented REST APIs using Swagger/OpenAPI for easier integration and maintenance.
- Participated in Agile ceremonies, defect fixing, code reviews, and deployment activities across development and QA environments.

EDUCATION

MS in CS - University of North Texas | Passed Out: December 2023 | CGPA: 3.5/4.0

BTech in ECE - Vellore Institute of Technology | Passed Out: August 2020 | CGPA: 9.0/10
